

Project Brief

Canoe Slalom Facilities

Column, Beam & Slab Strengthening

Athens, Greece
2003

Located on the site of the former Athens International Airport (several venues were constructed for use during the 2004 summer games). Column, Beam & Slab Strengthening of an existing structure to serve as the home of the canoe slalom competition. All of the whitewater rafting contests take place on a manmade course that ends at the existing building.

To accommodate the additional weight of the water, storage areas for the boats and the initial part of the course the building had to be strengthened.

Tyfo® SEH-51A and SEH-25A were used on beams and columns supporting the structure.
